

MARINE ASSET TRACKER 2.0

Real-time satellite tracking and mobile optimised fleet management software for workboat, fishing vessel and offshore operators.

Marine Asset Tracker (MAT) 2.0 is an integrated satellite communications and software solution that enables operators of workboats, barges, rigs, support vessels, commercial fishing boats and unpowered assets to monitor their fleets accurately and reliably.

By offering a range of SkyWave and Globalstar tracking devices that are fully integrated with Pole Star's web-based software solution, MAT allows you to monitor your entire fleet in a single, global view.

The MAT software solution is web-based and mobile optimised so that you can manage your fleet from your desktop, laptop, smartphone, tablet or any internet-enabled device. Event-based notifications by email or SMS keep you informed, even when you are not logged-in.

Key Benefits

Convenient

- Manage your fleet from your desktop, laptop, smartphone or tablet device
- Real-time and historical tracking
- IsatData Pro and Globalstar hardware integration options
- Interactive maps and weather overlays
- Automatic and on-demand position reporting
- Event-based notifications by email or SMS, wherever you are

Cost effective

- Flexible service plans
- Unlimited user logins

Control

- Download and share reports
- Control user permissions

Enhance your operations with real-time intelligence

Manage Your Fleet

With your entire fleet visible in a single view, MAT gives you the information you need to operate your fleet efficiently and effectively. Combining interactive full-screen maps with weather overlays, fleet list, vessel search & locate functionality, a new and improved user-interface plus real-time, on-demand and variable position reporting, MAT is the complete monitoring solution for operators of tugs & barges, support vessels, fishing vessels and other workboats, as well as rigs, “dead” tows and unattended installations.

Available Anywhere

With MAT, you know where your boats are, no matter where you are. MAT is mobile optimised so that you can manage your fleet from your desktop, laptop, smartphone, tablet or any internet-enabled device. Event-based notifications by email or SMS keep you informed, even when you are not logged in.

Four Map Options with Weather Layers

Maps

Choose from street, hybrid and satellite maps from Mapbox plus C-Map marine charts.

Weather

MAT offers high-quality graphical weather forecast layers so that you can monitor sea conditions and improve safety and efficiency.

Weather layers include:

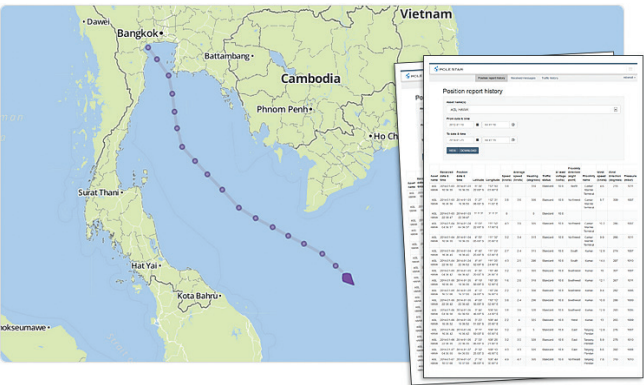

- Cyclones
- Pressure
- Sea surface temperature
- Wind speed and direction
- Wind and swell wave height
- Primary wave direction

Weather provided by Tidetech Applied Oceanography. Weather forecast data is updated every 12 hours.

Low Cost Solution

With MAT, you can choose the hardware & rate plan that meets the needs of each asset in your fleet. From real-time reporting for workboats and fishing vessels, to low frequency reporting for barges and other low-speed assets, plus automatic reduced-rate reporting while stationary, MAT gives you the right information at the right price for your fleet.*

*Options and rate plans may vary dependent on hardware selection

Compliance Reporting & Evidence

Go back in time and examine the movements of an asset at a specific moment in the past. Download, view, analyse and share current and historical tracking data with your colleagues or for use in arbitration.

Ideal For:

WORKBOATS	OFFSHORE OIL & GAS	COMMERCIAL FISHING
		
MAT for workboats is a web-based tracking solution that integrates low-maintenance tracking devices for powered and unpowered assets, enhancing operational awareness at a low monthly cost.	MAT addresses the unique needs of the offshore oil & gas industry by combining turnkey, mobile-optimised tracking software with integrated tracking devices, delivering operational awareness at a great value price.	Fishing vessel operators face difficult economic and environmental conditions on a daily basis. That is why MAT offers you rugged tracking devices, real-time tracking, and accurate weather forecasts, all at a low monthly cost.

Control Your Data

Stay in control of privileged information with user logins and permission controls. Assign full, restricted or view-only access to your users in order to control access to, and dissemination of, sensitive fleet information.

Global Support Network

We offer our customers 24/7/365 multilingual support from our offices in the UK, Hong Kong and Panama. Our global teams of product experts provide setup and ongoing support, technical support, training, troubleshooting and diagnostics around the clock, by phone and email.

Do you charter your vessels?

MAT allows you to:

- Monitor hours of usage and areas of operation
- Identify and monitor incidents
- Download historical position data for use in arbitration

Additionally, our global network of over 60 distributors offers sales and service support in your local language and time zone.

HARDWARE		
	 MAT-IDP690 (IsatData Pro)	 MAT-GS (Globalstar)
POWER	 Mains powered	 Battery powered
COMMUNICATION	 Two way	 One way
PROGRAMMABLE	 Over the air	 In the field
POSITION REPORTING	 Automatic  On-demand  Variable	 Automatic
COVERAGE		

FEATURE		DESCRIPTION
TECHNOLOGY		
Improved interface	New	New interface that is more modern and easier to use than ever before
Mobile optimised	New	MAT is mobile optimised so that you can manage your fleet from your desktop, laptop, smartphone, tablet, or any internet-enabled device
Web-based		No downloads, no software to install, no hassle. Simply log in, and start managing your fleet
Secure		HTTPs encryption, password protected logins and update logging
Satellite tracking		Reliable and secure satellite tracking
USERS		
Unlimited users		Create unlimited users
Manage permissions		Control user access with logins and permissions
MAPS		
Full-screen maps	New	Full-screen interactive maps with easy drag-to-pan and click-to-zoom navigation
4 map options	New	Street, hybrid and satellite maps from Mapbox plus C-Map marine charts
Quick search	New	Search for a ship to automatically zoom and pan to its location
POSITION REPORTING		
Variable		Change your reporting rate
On-demand		Request a real-time position report
LAYERS		
Layer selector	New	Select your choice of map and weather layers
Weather		Overlay weather conditions including: cyclones, pressure, wind speed & direction, wave height, wave direction and more
NOTIFICATIONS		
Email & SMS		Send notifications to unlimited recipients, by email and SMS
Zone notifications		Alerts you when a ship is detected inside a defined zone or area (unlimited zones)
Overdue position reports		Alerts you if a ship does not report on schedule
REPORTS		
Downloadable reports		View, download and share your fleet’s position history
HARDWARE		
MAT-IDP690	New	Ideal for powered marine assets, tugs, support vessels, workboats and fishing vessels
MAT-GS	New	Ideal for unpowered marine assets, barges, “dead” tows and unattended installations
Backwards compatible		Also compatible with legacy hardware: MAT1, MAT3 and MAT5
