

Pole Star Platform

Risk Insight

Risk Insight provides you with near real-time updates of incidents such as piracy, terrorism, insurgency and other maritime crime around the world, right inside your Pole Star account.

With easy to understand incident icons displayed on your fleet map, along with the ability to easily select time intervals to reveal current and historical incidents, Risk Insight gives you an overview of the risks to your fleet, and provides you with the situational awareness and actionable intelligence you need to avoid risk.

Integrated into the Pole Star services you use every day, Risk Insight gives you a complete picture of the immediate and long-term maritime risks to your fleet, without the need to switch between different services or screens.

Key Benefits

- Overview of immediate and long-term maritime risks
- Integrated maritime risk intelligence and fleet monitoring in one system
- Enables fleet and vessel risk avoidance
- Provides actionable intelligence and situational awareness of 'risk to life' vessel hazards
- Simple and easy to understand incident icons for 'at-a-glance' visibility
- Data by the leading maritime security risk monitoring solution
- Near real-time updates, 24 hours a day, 7 days a week

Features

Situational awareness

By providing maritime risk intelligence directly in your Pole Star account, we can offer a near real-time picture of where your vessels are in relation to security threats and potential trouble, for complete situational awareness.

Actionable intelligence

With maritime risk intelligence and fleet monitoring integrated in one system, you get an instant overview of where your vessels are in relation to real and potential risks, allowing you to route them away accordingly.

Near real-time updates

MaRisk provides near real-time updates of incidents such as piracy, terrorism, insurgency and other maritime crime around the world - 24 hours a day, 7 days a week.

Easy to select time intervals

The easy-to-use time interval selector provides you with an overview of current and long-term risks. Simply slide the bar to view incidents that occurred within a specific time period – from current (occurred within the last two weeks), to up to one year ago.

Better value

Integrating your maritime risk intelligence and vessel monitoring services means you get more from each service, adding value to your spend.

Quality data

Provided in partnership with Risk Intelligence, the leading provider of maritime security and risk intelligence to the maritime industry.

Incidents

- Hijacking at sea
